THE
GLAMPER
RANGE
07/2023

Tentickle's Luxury Glampers showcase an ingenious and economic design combining an individual canvas cabin with a stretch tent roof, providing double roofing for a comfortable living climate even in hot and hostile environments.

Add the optional outer shade net to these luxury camping tents for even more protection and durability.

THE STRETCH TENT ROOF: 770gr Tentickle Tentflex, fire-retardant, waterproof, UV repellent, anti-microbial, highly tensile, Teflon-coated polyester stretch. The outside has a smooth, matt finish with a water-repellent lotus effect. The inside of the fabric has a natural flow and a soft, organic feel – not requiring any further draping. The fabric reflects light very effectively and offers a great canvas for spectacular lighting concepts.

THE CABIN: 500gr ripstop canvas, flame retardant, anti-fungal, combined with high tensile rubber coated mesh and optional non-milking clear PVC. Available in light grey, chino, ivory and taupe.
